

Preferred Alternative Overview

- The Preferred Alternative is to widen SH 402 to four lanes between US 287 and the I-25 interchange.
- Developers, in coordination with CDOT and the City of Loveland, have partially built SH 402 improvements between US 287 and St. Louis Avenue (CR 13C), improving the north or westbound side under a Categorical Exclusion dated September 18, 2003. This interim condition will remain until the development on the south side of SH 402 is completed at a future date.
- The Preferred Alternative (the Meander Alternative) provides improved mobility and safety and minimizes impacts on the community and the natural environment.
